Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a method for differentiating between two states of an analyte, classified in class 435, subclass 7.1, for example.
- II. Claim 14, drawn to a method for identifying FSH in a sample, classified in class 435, subclass 7.94, for example.
- III. Claim 15, drawn to monoclonal antibody ECACC 00032004, classified in class 436, subclass 548, for example.
- IV. Claim 16, drawn to monoclonal antibody ECACC 00032005, classified in class 530, subclass 588.1, for example.
- V. Claim 18, drawn to a device, classified in class 436, subclass 518, for example.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation, different functions and different effects.

Inventions I and II are unrelated because they are different methods having different method steps.

Inventions I-II and III-IV are unrelated because they are not disclosed as usable together. The methods of groups I and II do not require the monoclonal antibodies of groups III and IV.

Inventions III and IV are unrelated because they are different proteins having different structures and different physical properties.

Art Unit: 1641

Inventions I-IV and V are unrelated because the methods of groups I and II do not require the device of group V.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the search required for Group I is not required for Group II-V, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claims 17, 19 and 20 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on two sets of claims with different features. See MPEP § 608.01(n). Accordingly, the claims 17, 19 and 20 not been further treated.
